

## THE WORLD OVER

"SITS DOWN" ON LAKE BOTTOM

PORT ARTHUR, Ont. — A "sit-down" strike at the bottom of Lake Superior, carried out by a lone diver, was chalked up Friday night as successful.

Tom Dimo, a diver, was engaged Thursday to examine the bottom of the intake pipe connected with the Port Arthur waterworks system 30 feet below the surface. It was the first it had been examined in 32 years.

Dimo donned his diving suit and sank down through a hole chopped in the ice. When he got down, he refused to come up until his higher wage demands had been agreed to by the city engineer's department. Department representatives agreed to his demands.

Returning to the surface, Dimo reported the pipe and the copper screen covering it were in good condition.

### MAY DISPOSE OF E. P. RANCH

A report was circulated last week that the EP ranch was to be sold soon. This started with the passing of an order-in-council forbidding sale of the mineral rights on the ranch for a period of ten years, and also drilling for oil on the property for the same period. It is understood that this order was made upon presentation from the owner, now Duke of Windsor.

### SECOND EAST WIN IN 11 YEARS

TORONTO, March 6.—Canadian supremacy was wrested from Manitoba Friday with considerable flourish by Cliff Manahan's Edmonton Royals, a newly-assembled unit guided by the maestro who last won the Macdonald's Brier Tankard in 1933.

In a playoff for the championship, the Alberta rink humbled Jimmy Welsh's Winnipeg Deer Lodge titleholders 12-7. For below the form there showed in winter eight he himself had made ties to tie with Alberta for the leadership, the Welsh curlers were outclassed.

The customary accuracy of Manitoba's sniping was absent as Manahan assumed control on the first end. While 27-year-old Jimmy himself made brilliant recoveries, the support of his rink wavered in the crisis.

The astonishing reversal of fortune in a playoff was reminiscent of one of the biggest galleries in Macdonald's Brier history, closed out a week of curling in which the west's traditional superiority was maintained.

## J. C. SPENCE ELECTED PRESIDENT OF THE CARBON TENNIS CLUB

Fees For 1937 Set at General Meeting of Carbon Club

The Carbon Lawn Tennis Club held its annual general meeting on Friday March 5, for the purpose of electing officers and organizing for the coming season. In the absence of the president, W. L. Poxon, J. C. Spence, the vice-president, presided.

The following officers were elected: Hon. Pres.—J. J. Garrett. Hon. Vice-Pres.—Len Poxon. President.—J. C. Spence. Vice-Pres.—C. H. Smith. Sec.—Treas.—W. A. Braisher. Executive Committee—President, Vice-President, Secretary, together with C. Poxon and Miss R. Reed. Team Captain—J. C. Spence. Members Committee—Poxon.

It was decided to affiliate with the Alberta Lawn Tennis Association in order to arrange team matches with other towns. It was also decided to provide a "Round Robin" singles competition upon to members of the club for a Challenge Cup, and Miss R. Reed and C. Poxon were appointed as a committee to arrange this.

The appointing of a caretaker and the drawing up of Court rules was left in the hands of the Executive Committee.

The fees for 1937 were set as follows: Men, \$4.00; Women, \$2.00; School Students, \$1.00.

### IS SPRING HERE ?

With the weatherman so changeable in his moods one does not like to predict the weather in this part of Alberta. However, when the days turn warm and the snow all melts, and the roads dry up, and the spring garments appear, surely these are sure signs of a changing climatic condition. As a result of this the gophers are out and reports from other sections of the province are the effect that the birds are coming back from their long holiday in the south. If spring is not here, it surely isn't very far off.

With more than a week of fine weather the snow did not take long to vanish and farmers are beginning to prepare for an early start in seeding operations. While it is too early to even think of getting on the land yet, it is predicted that another three weeks will see many a tiller in the seed—that is, unless we get another snow storm in the meantime, and we usually have a spring storm. Let's hope that it holds off this year until after seeding has been completed.

Only twice in 11 years has the weather produced a winner.

### FAIR CROWD ATTENDS PLAY

The royalty play "Moloch," which was staged in the Farmers' Exchange hall on Monday night under the auspices of the Young People's Society of the United Church, met with fair success, and while the crowd was not large, the society will break even on the event.

The play was presented by the young people of the Crescent Heights United Church, Calgary, and received considerable praise from the audience on the high-class performance.

### —LONG YEARS AGO—

March 13, 1924

If the weather permits the football club will hold a practise game on Sunday afternoon.

At the first meeting of the new council of the Municipal District of Carbon last Thursday, S. N. Wright was chosen reeve; R. S. Reed, deputy reeve; and P. Dalziel of Calgary, alder.

A second long distance wire has been installed at the local telephone system, making it possible to put through two long distance calls simultaneously.

D. F. McKinnon is building a house to be used as a residence and police barracks by the local A.P.P.

T. J. King, now agent for the Raw. J. King, is leaving his farm and moving to Carbon to live.

### ACCIDENT LEADS TO A MAJOR INDUSTRY

A cow kicking over a lamp, they say, started the Chicago fire. A spider climbing a thread brought Bruce of Scotland victory. But these and many other like historical incidents pale before the story of the housewife whose carelessness founded one of the most important phases of the Canadian fish industry.

Away back in a Scottish village a housewife left a haddock hanging from the rafters of her cottage as she went out for the day. She had left it too near the peat fire, however, and when she returned the fish was all dried by the smoke from the fire. She decided to cook it anyway and the result was so appetizing that she served the novel and smoked fish became a national delicacy.

Today the popularity of smoked fish has spread everywhere and the appetite for this delicacy has found in Canadian organizations of international repute, some of which have

BY THE S. M.

### FAIR PLAY

Have you noticed how the average boy wrestles? Or the professional wrestler? Let's consider them. The boys want to lose. O.K., let them go to it without intervention and they will speedily attempt to reduce us to a mere pile of pulp, instead of merely giving both parties light taps. The result generally ends in one or both parties losing their temper. And again, the wrestler—everything apparently allowed except death by electrocution, boiling in oil, or hanging.

We marched to "Spion Cop" on Saturday last. There we had a merry snowball fight and the battle field quickly took on the appearance as though a terrific hailstorm had just passed. Joy Taylor appears to enjoy scooting down muddy banks on his tummy to the detriment of his uniform—but he came up smiling. That is the kind of spirit everyone enjoys to see. A few of us got slightly bent when they happened to stop the fight of a snowball. But what's the odds? A smile quickly sets matters right. The company of one who plays fair and works fair is enjoyed by all, but have you noticed how everyone steers clear of Mr. Grumpy who plays dirty and does his best to cheat his neighbors? If you like fair play from others, then play fair yourself.

The second hammer on the resinoid boards "Hill 'im, hit 'im" he vainly entrusted his principal, but the heavy weight aspirant, hopelessly outclassed, failed to comply. He recoiled dazedly from a vicious attack, and ended despairingly at the ring post.

"Not with that, you fool," shouted his second, "you'll be disqualified."

Had been established for a century or more.

The Canadian climate has been found ideal for the production of this delicacy and other cured fish. Today the Dominion holds a foremost place in the world trade in the export of dried, smoked, and pickled fish.

Two explanations are made. One is in grains.

### WHO ARE THE FIRST REAL STARS OF TELEVISION?

Time was when Radio City's swank third floor lobby, crossroads of the microphone world, could be called a dignified and quietly ritzy place. But lately it's been resembling the backstage tent of a freak show much more than its usual conservative self. A horde of the strangest looking people anybody has ever seen have set up their permanent camp in Studio 3-H, and around talking a peculiar language of merely giving both parties light taps. The result generally ends in one or both parties losing their temper. And again, the wrestler—everything apparently allowed except death by electrocution, boiling in oil, or hanging.

But they're not freaks, nor have the studios been turned into a nuthouse. It's simply that television is no longer something we're going to have on these days. Television is here! And the strange-looking people to be seen around NBC are the first stars of television all made up to appear life-like in the lens of a thing called an "iconoscope camera."

If you were lucky enough to have one of the hundred television sets now stationed throughout the New York area you could tune in for an hour or two every night in the week and enjoy talks in your own living room. This is the first time since last summer, although the broadcasts are conducted for test purposes and the sets are not yet for sale.

—Radio Mirror.

### THE WORLD OF WHEAT (By H.G.L. Strange)

A most unusual situation exists at the present moment with the price of wheat on world markets.

No. 1 Northern Canadian wheat at Liverpool is selling for fourteen cents a bushel more than the best Argentine wheat. The price is higher than the best Indian and 25 cents more than the best Argentine.

These spreads are considerably greater than the extra quality of "Manitoba" usually warrants, yet today, at these wide spreads, such countries as Italy are being purchased as well as probably bring the "carry-over" of Canadian wheat on August 1st next down to a normal level of not more than 40 million bushels.

Why is it that suddenly the world is purchasing so much Canadian wheat at such unusual premiums?

Two explanations are made. One is in grains.

## CHANGES MADE IN MANAGEMENT OF THE LUMBER COMPANY

Mr. Woods Takes Over Carbon Yard This Week

A change in yard managers has taken place in the offices of the Crown Lumber Company at Carbon. Mr. T. Gutterd, who has managed the Carbon yard for the past couple of years, has been transferred to Black Diamond, while Mr. Woods, formerly of Delia, has taken over the Carbon yard. Mr. Gutterd left on Tuesday for his new position at Black Diamond. He has been in the Carbon yard for the past three months, was formerly manager of the Crown Lumber yard at Delia, and consequently well recommended both as a citizen and business man, and we wish him the best of success here.

Prior to Mr. Gutterd's departure a number of his friends presented him with a pen and pencil set as a token of good wishes. Mr. Gutterd's presentation last week to the departing citizen.

"To what to you attribute your remarkable career?"

"Well, replied the very old gentleman, 'I reckon I got a good start on most people by being born. I'd say I was discovered, therefore having less to worry about.'

That some countries in Europe, particularly Italy and Germany, are this year very short of food for their people and so are willing to pay these prices. The other thought is that a good deal of Canadian wheat now being purchased is not for immediate consumption but rather for storing up against possible war. Canadian wheat is particularly well-suited for this because it has good keeping qualities.

Sooner or later, however, these wide price spreads will narrow up.

Following factors have tended to raise prices: Italy and Germany continue to purchase wheat from many countries in large quantities. Spain bidding for wheat. Argentine large shipments being eagerly sought. Wheat in North China needs additional moisture. Prices of many raw materials rising. Mexican vegetable crops damaged by frost.

Following factors have tended to lower prices: European crop conditions generally favorable. Many prospects to start shipping to world markets soon. Argentine and Australian crops of high quality. U.S.A. wheat which has received precipitation. Germany permits admixture of potato and rye flour in bread. Russia has a record acreage in grains.

### SHIP-WECK LEAD TO THE DISCOVERY OF SMUT CONTROL

How often better ways may be discovered by fortuity, says B. Leslie Ennis, who describes below how accident led to the discovery of means for controlling smut and bent grass by treatment of the seed.

The evolution of the safety match from the kind that strikes anywhere was due to the accidental omission of an essential ingredient of the chemical solution. The matches of this batch could not be induced to ignite, whether by scratching on a brick wall or on the seat of the pants. The despondent factory chemist, contemplating ruin, was rubbing aimlessly the head of one of the dead matches against a drying smear of the substance which had been left out, when, presto! the match lit! Thus by accident was born the safety match which strikes only on the box.

### Original of Seed Treatment

To a marine dentist we owe the discovery of seed treatment for the control of smut. Toward the end of the seventeenth century a whaling vessel was wrecked on the coast near Bristol, England. Farmers sent the vicinity salvaged seed of the grain which, being found unsuitable for grinding into flour, was used as seed. One observant farmer noted that the wheat grown from the brine-soaked salvaged seed was free from

smut than was the crop produced from home-grown seed. Writers of the eighteenth century refer to the practice of bringing seed grain and to the influence of the salts of sea water in reducing the incidence of smut. But it was no longer necessary to wreck a ship in order to procure the treated seed, any more than it was to barn down giggeries for the gratification of appetite on roast pork, which was an ancient Chinese following Bo's discovery of the delicacy, if we are to believe "Elihu" or Charles Lamb, in his "Disquisition Upon Roast Pig." That was another epoch-making, accidental discovery which led eventually to the invention of the gridiron!

### Organic Mercury Dust

The treatment of seed grain with brine continued to be practised widely for nearly a century following the discovery of organic mercury compounds. A chemist discovered the greater efficacy of blue vitriol for the purpose. But it was not until 1912 that European scientists searching for new chemicals, wherewith to combat diseases of humans, discovered that certain organic mercury compounds are highly toxic to bacteria and germ spores and yet comparatively harmless to body tissues. This was what investigators of seed treating had been seeking for, and thus science again came to the aid of the farmer by furnishing him with an inexpensive, safe means of controlling seed-borne diseases and root rots of crops.

## TOWN & COUNTY Personalographs

Mrs. H. C. Wilson went to Calgary last Thursday to spend a few days visiting with her sister, Mrs. Malton.

Mr. T. Gutteral left on Tuesday, accompanied by Gerry Picard, Gus Glick and Buster Simpson, the first three mentioned going on to Black Diamond, while Buster Simpson has returned to the Peace River District.

S. J. Garrett motored to Calgary on Monday.

The Corner Clothing store has been re-decorated for the Easter "rush."

Mr. Woods, the new manager of the Crown Lumber Company has been the guest of the home of Rev. and Mrs. McManis.

Edgar Anderson, who has spent the winter working at East Coulee, was a Carbon visitor on Friday last.

John A. Strachan of Three Hills was a Carbon visitor on Monday, making the trip with Dr. Burrill.

W. Brooks of Calgary motored out to Carbon on Sunday accompanied by his mother, Mrs. Geo. Brooks, Mrs. Green, who has been visiting with Mrs. Elliott, returned with them to Calgary.

Miss Myrtle Oliphant spent the weekend in Calgary.

A light snow fall occurred on Tuesday night, but with warm weather it disappeared Wednesday. It looks like rain as we go to press Wednesday.

Mr. and Mrs. J.H. Oliphant and Mrs. Cyril Oliphant were Calgary visitors on Monday.

Mrs. Pamphlet of Drumheller was a visitor at the home of Mrs. S.J. Garrett on Monday.

Mr. and Mrs. Verling Moorhouse have again taken up residence in Carbon after spending the winter at East Coulee.

C.H. Nash announces a huge grocery sale, commencing on Saturday, March 13th and lasting for two weeks. See the posters advertising this event, as well as the Easter specials at the Corner Clothing.

Lawrence Poxon of Drumheller, was a Carbon visitor on Monday.

Professor—Now at what speed does light travel?  
Student—Pretty fast, sir. Anyway it gets here far too soon in the morning.

## Empress Winter Golf Tournament

While the rest of Canada is shivering itself out of snowdrifts, Canada's only mid-winter golf tournament of an international character will be held at the Royal Colwood Golf Club Course at Victoria, B.C., from March 1 to 6. This is the annual Empress Winter Amateur Golf Tournament, now in its ninth year, which brings well on to 200 enthusiastic golfers from Canada, the United States, and Europe into competition for a large number of valuable prizes, including the Sir Edward Beatty Challenge Cup, Chamber of Commerce Trophy, Victoria Rotary Club Rose

and the Watson Inter-District Team Cup. Favored by summer-like weather, the tournament is the high-water mark of the social season for the winter colony on the sunny southern tip of Vancouver Island. Victoria will be in festive mood for the event, while Colwood's beautiful clubhouse and the rental Empress Hotel, with its gardens, conservatory, and Crystal Garden swimming pool, will form an ideal backdrop for the colorful social activities which mark the six days of tournament play. Included as added attractions will be a dinner

dance and entertainment every evening in the Empress Hotel, with presentation of prizes at a Grand Ball on Saturday night.

Golf experts and dubs alike will find competitions suited to them in the week's play at Royal Colwood, a lovely course constructed on park land, 6201 yards in length, with a par 72 that was broken only once in tournament play. Play will be divided into classes for both ladies and men, ranging from open amateur events and handicap matches to features that stress the social side of the grand old game.

drove off. The ball sailed straight down the fairway, leaped onto the green and rolled into the hole. The golfer threw his club in the air in excitement.

"Why, I just did a hole in one," yelled the golfer, a wild gleam of delight in his eyes.

"Did you?" asked the wife placidly.

"Do it again, dear, I didn't see you."

## MOONLIGHT

(E.F. Brummer)

The warm atmosphere of the still January night brought forth a world of infinite beauty. Great silences, austere and searching, reigned over the quiet valley. A gloriously rose tinged sunset preceded the quickening dusk; but not before it had created an unforgettable scene in the heart of the observer.

All the tinnings of the winter woods were extremely delicate and elusive. When the afternoon sun waned and touched the top of the hills, there seemed to be all over the hills an abundance of color—yet not the color but the spirit of color. There was really nothing but pure white snow after all, but one had the impression of fairy-like blendings of rose and violet, of onal and gold. One felt sure that the tint was there; but when looked at directly, it was gone. Only just when the sun was setting was there a fleeting moment of real color.

Darkness followed swiftly the wane of dusk. The clear, black sky was manifestly sprinkled with myriads of glistering light—the countless twinkling stars that have kept their watch up above ever since time immemorial.

This Appetizing Recipe

## FISH CHOWDER

150 Pounds of fresh fish (cod, halibut or other fish)

2 Cans of dried potatoes

2 Cans of dried carrots

2 Cans of dried corn

1 Can of milk

1 Can of salt

1 Can of pepper to taste

Remove the skin and bones from the fish and cut into small pieces.

Put the fish in a large pot and add the water for 15 minutes.

For the last 10 minutes, remove the pieces and cook the soup in the fat and butter.

Put in the milk and gradually stir in the fish and vegetables.

Continue this mixture with the fish and vegetables, season to taste with salt and pepper, stir for about 10 minutes, stir frequently and serve hot.

## "Somebody to see you!"

IF EVERYBODY with something to interest you should come and ring your bell, what a nuisance it would be. Think of the awailing, jostling crowd, the stamping of feet on your porch and carpet!

Every week we know of the callers who come to see you. They never jangle the bell—they don't take up your whole day trying to get your attention. Instead, they do it in a way that is most considerate of your privacy and your convenience. They advertise in your newspaper!

In this way you have only to listen to those you know at a glance have something that interests you. They make it short, too, so you can gather quickly just what you want to know. You can receive and hear them all without noise or confusion in a very few minutes.

In fairness to yourself look over all the advertisements. The smallest and the largest—you never can be sure which one will tell something you really want to know.

ANY DAY A FISH DAY
